PROFESSIONAL SUMMARY

I am a Frontend Developer who turns product ideas and technical requirements into clean, responsive, user-friendly web and mobile experiences. I work mainly with React Native and Next.js, with hands-on experience integrating RESTful APIs, managing application state, and building accessible, production-ready interfaces. I care about performance, usability, and maintainable code.

SKILLS

TECHNICAL SKILLS:

JavaScript & TypeScript: Writing modern, maintainable frontend code using ES6+ features, strong typing, reusable functions, and structured application logic.

React.js & React Native: Building reusable components, interactive interfaces, and cross-platform web and mobile applications with a focus on performance and maintainability.

Next.js: Developing production-ready applications using server-side rendering, routing, API integration, and SEO-friendly rendering strategies.

Vite: Setting up and developing modern frontend applications with fast development workflows, efficient builds, and optimised development environments.

RESTful APIs: Integrating third-party and internal APIs, handling asynchronous requests, managing API responses and errors, and connecting frontend applications to backend services.

Git: Managing source code with Git, including branching, pull requests, code reviews, conflict resolution, and collaborative development workflows.

PRODUCT DELIVERY:

Agile/Scrum: Working within sprint-based development cycles, participating in planning, reviews, retrospectives, and daily team collaboration.

Feature Development: Translating product requirements and designs into functional frontend features from development through testing and release.

Deployment Support: Supporting production releases, troubleshooting deployment issues, and verifying frontend functionality after deployment.

Cross-Functional Collaboration: Working closely with product managers, designers, backend developers, and QA teams to deliver features from requirements to production.

Technical Documentation: Maintaining clear documentation around components, implementation decisions, API integrations, and development workflows.

WORK EXPERIENCE

Maekandex Communications Limited

Frontend Developer | 2025 – Present

Junior Developer | 2024 – 2025

Student Junior Developer | 2024

Frontend Developer | 2025 – Present

- Build and maintain responsive web and mobile interfaces across live products including LetsMeet, 9jaBuzz, Pluser Games, LITeGre Prediction, and JustJobNG.
- Develop reusable React/Next.js components and integrate *RESTful APIs* to deliver functional, production-ready features.
- Translate product requirements and UI designs into responsive, accessible, and user-focused interfaces.
- Manage application state, troubleshoot frontend issues, and optimise performance across different devices and screen sizes.
- Collaborate with backend developers, product managers, and designers throughout the development and release cycle.
- Participate in code reviews, testing, debugging, and production releases to maintain application quality.

Junior Developer | 2024 – 2025

- Developed and maintained frontend features across multiple web applications under the guidance of senior developers.
- Integrated APIs and connected frontend interfaces with backend services to support real-world product functionality.

- Built reusable components and responsive layouts while improving usability across different devices.
- Participated in debugging, testing, code reviews, and sprint activities.
- Worked closely with product and engineering teams to translate requirements into functional features.

Student Junior Developer | 2024

- Supported the development of early-stage product features while gaining hands-on experience in modern frontend development.
- Assisted with UI implementation, API integration, debugging, testing, and application maintenance.
- Worked alongside experienced developers to understand development workflows, Git practices, code reviews, and Agile delivery.
- Contributed to product improvements across LetsMeet, 9jaBuzz, Pluser Games, LITeGre Prediction, and JustJobNG.

ICT Resource Centre, FUNAAB | Abeokuta

Voluntary Intern Software Engineer | Feb 2025 – Sep 2025

- Maintained campus web portals serving 10,000+ students and staff, improving responsiveness and reliability.
- Diagnosed software defects and database connectivity issues to reduce disruptions across internal platforms.
- Supported deployment updates and application maintenance under senior engineering supervision.
- Performed unit testing, system backups, and troubleshooting to improve application stability.
- Collaborated with senior engineers to maintain core university systems and resolve technical issues within structured development workflows.

EDUCATION

Federal University of Agriculture, Abeokuta

Abeokuta | 2023 – June, 2026

B.Sc., Mathematics

Africa Learning University, Nigeria

Lagos | 2023 – June, 2024

B.Sc., Software Engineering

CERTIFICATES

Degree of Bachelor of Science (Mathematics) – SECOND CLASS UPPER

Federal University of Agriculture, Abeokuta
